I STRONGLY OPPOSE HR 4026. My husband uses the traffic and or weather daily since he hauls haz-mat for a local trucking company cross country. This service, since we already subscribe to XM, has been VERY helpful. When he is coming into a large town, he can get accurate traffic information and should there be a problem with the highway he is traveling on, he can find another route. All this means is that the driver can continue on to his/her destinations without being detained due to a traffic backup.
